Research and Development Activities

Fields of interest: Economics of Education, Labor Economics, Law and Economics,
Behavioral Economics.

a. Summary of Past Research and Development Activities

My past research investigates a variety of policy questions concerning the allocation of
public resources including the relationship of government expenditure to students'

achievements, inefficiencies, the effect of skill-biased technological changes on publicly financed teacher quality and teacher quantity, the organization of funding schemes for higher education, and the efficiency of disciplinary actions against malpractice of firms. I also work on gender inequality and the labor supply of mothers, behavioral biases of professionals in their evaluation of firms and assets, and environmental economics.

b. Work in progress

An Experiment on donations, personal stories, and cheating, joint with Ronen Bar-El and Avichai Snir.

Anchoring bias as an explanation for the accruals' anomaly, joint with Itzhak Aharon and Ronen Barak.

Industrial symbiosis, joint with Artyom Jelnov.

The gender wage gap and the motherhood penalty: A theoretical framework, joint with Naomi Friedman-Sokuler.

Compulsory schooling laws, ethnicity and social opportunity, joint with Sarit Cohen Goldner.

c. Publications
